

Activity: Snow Paint

THE TOOLS YOU'LL NEED

- Cardstock or Thick Paper
- Found Materials (Scrap Paper or Cloth, Leaves, Sticks, Seeds, Flowers, Buttons)
- Glue for Collage and Snow Paint
- Shaving Cream
- Bowl
- Spoon or Craft Stick
- Two Small Cups (For Measuring Glue and Shaving Cream)
- Optional: Glitter or Food Coloring

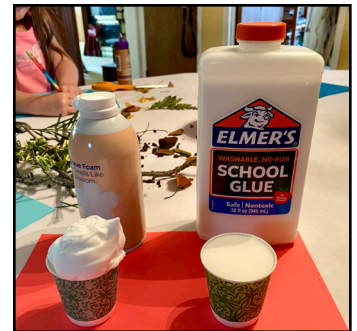

Step 1
Collect craft scraps or natural materials. We took a walk in our neighborhood and found sticks, leaves, bark, and petals.

Step 2
Make a mountain out of paper and/or found items. Glue it to your cardstock or other thick paper.

Step 3
Make a nature collage by gluing the items you found to your paper. A collage is a picture you make with found items.

Step 4
Measure out equal amounts of glue and shaving cream. 1/3 cup of each will make plenty!

Step 5
Add both glue and shaving cream into your bowl.

Step 6
Using your spoon or craft stick, whip together the glue and shaving cream. It will get thicker. You may add glitter or food coloring at this time.

Step 7
Paint the "snow" onto your collage. You can use any extra snow paint to make your own creations.

Step 8
Let your painting dry overnight. The snow paint will puff up. Once dry, it will be spongy to the touch. Enjoy your creation!
